

## Presents

# A special PBS film Showing of *Seeing in the Dark* Friday July 4, 2008

In the Moanahoku Hall at 3:00 pm

Showing is free to the Public, Introduction by Hilo Astronomy Club

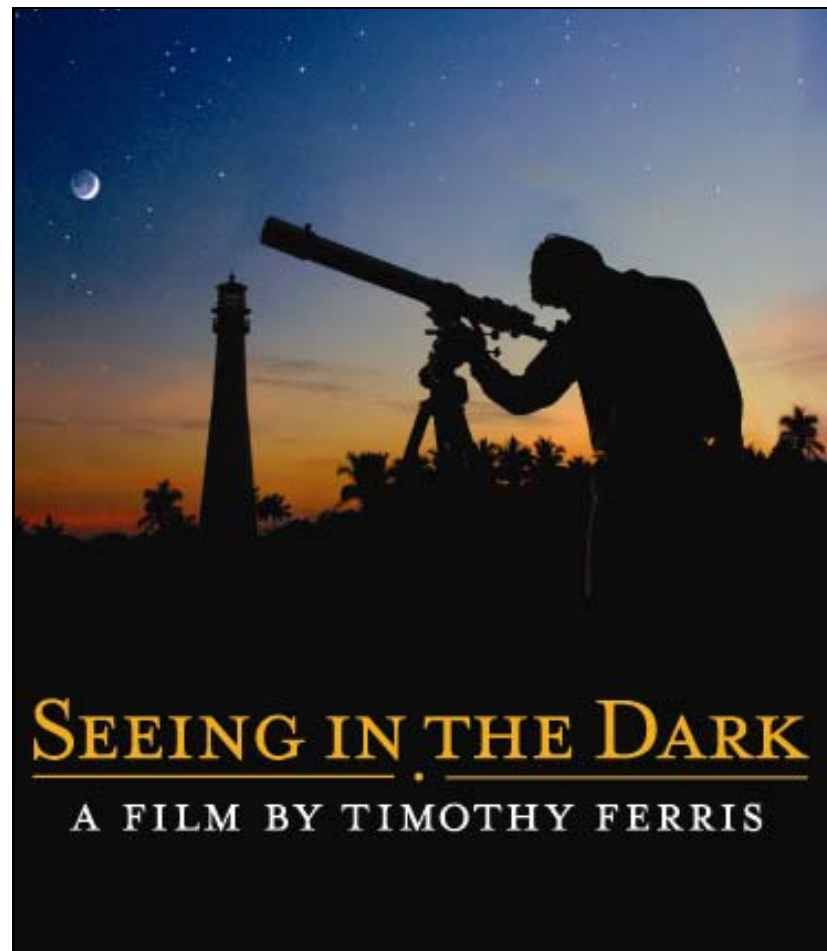

This film “introduces viewers to the rewards of the first-person, hands on astronomy—from kids learning the constellations to amateur astronomers doing professional-grade research in discovering planets and exploding stars. I hope it will encourage many viewers to make stargazing part of their lives, and a few to get into serious amateur astronomy.”

-Timothy Ferris

The Orion Nebula

Film maker Tim Ferris,  
“Our film is meant to be  
a timeless introduction  
to stargazing.”
